

We've been where you are; We know your needs

**YOU CAN SURELY
BET ON US.**

ABOUT US

Keeping an edge over your competitors is a must in today's economy. At BET, we work to ensure your technology infrastructure is up-to-date and running efficiently and because we believe that security is not an option but a paramount we are dedicated through our highly trained and skillful team and technology partners to provide you with peace of mind so you can feel in control and concentrate on growing your business and driving your operation towards excellence.

WHERE DO YOU PUT YOUR TRUST?

Nothing matters more than keeping you & your organization protected. That's a large responsibility.

WHICH IT PARTNER TO CHOOSE?

The choice is no longer a formality driven by one or two factors, but a necessity to ensure business continuity - only a specialized & certified partner can commit to this.

OUR VISION

is to become the most trusted and reliable address for high-end security, Information Technology and low current solutions in Africa.

OUR MISSION

is to understand our primary customers' values and dedicate our resources in the most efficient way to deliver the highest Quality/Value ratio.

ARE YOU EVER SAFE ENOUGH?

No one ever expects bad things
to happen to them. It always
happens to the other guy.
Except when it doesn't.

SECURITY SERVICES

A COMPREHENSIVE, INTEGRATED SOLUTION IS THE BEST CHOICE.

At BET, we do everything needed to ensure the quality of protection you and your organization receive is of the highest caliber. And, because we integrate all of our services, we're able to deduce the most accurate picture of what's happening during a time of high urgency.

While we hope you and your organization never need to use any of our security services, if you do, we assure you that you'll have peace of mind you made the right choice.

With experience in the security business, we know what it takes to protect you.

TOTAL PROTECTION

Your assets are important, make sure they're protected.

TOTAL SECURITY

Integrate your security solution with the latest technologies.

TOTAL PEACE OF MIND

When you know you're safe and secure, you can rest easily.

FIRE DETECTION SYSTEMS

We provide comprehensive solutions of Addressable and Conventional fire detection systems with state-of-the-art equipment from the leading brands of the world.

We provide consultancy and installation services for cost effective yet superb Smoke and Fire Detection setup in malls, civil projects, hospitals, corporate offices, and factories etc.

VIDEO SURVEILLANCE

Video surveillance systems to your specific requirements and needs from a single camera to multicamera system.

We offers the market's broadest and most consistent range of high-quality surveillance solution with some of the most sophisticated network cameras.

Whether you are looking for a video surveillance solution to secure the safety of people and places, or to remotely monitor property and facilities, We can meet your needs. You benefit from an extensive selection of network cameras, several with HDTV/ Mega-pixel resolution, which come in different forms to fully meet your requirements. Based on open IP standards, BET Systems

network cameras connect to any kind of IP network, including the Internet, and enable remote viewing and recording from anywhere in the world. They also provide advanced video analytics features, such as motion detection, audio detection and tampering alarm.

A WIDE PORTFOLIO OF PRODUCTS FOR PROFESSIONAL IP VIDEO SURVEILLANCE

You benefit from an extensive selection of network cameras, several with HD resolution, which come in different forms to fully meet your requirements:

- Fixed network cameras
- Fixed dome network cameras
- PTZ cameras
- Covert cameras
- Thermal network cameras
- Panoramic cameras
- HD and mega-pixel cameras
- Outdoor cameras

SECURITY SERVICES

ACCESS CONTROL SYSTEMS

INTEGRATED, MODERN AND FULL-
FEATURED ACCESS CONTROLS SYSTEM.

Designed to work together seamlessly, our products provide you with the technology you need to deliver sophisticated security solutions, from the simplest to the most challenging.

State-of-the-art access control software that integrates the most advanced security technologies with innovative networking capabilities to bring you full-featured security solutions serving facilities of any size.

FINGERPRINT DOOR LOCKS

Integrated all-in-one fingerprint authentication and RF card reader system with automatic or manual lock control.

- Convenient to use as it does not require users to carry special tools for verification.
- Hi-tech fingerprint recognition system that uses fingerprints that have no risk of replication or unauthorized use.
- Can distinguish from different types of material such as paper, film, rubber, silicon etc.
- Built-in thermal sensors.
- Waterproof.

FINGERPRINT TERMINAL

Our unique line-up of Fingerprint Terminals are an evolution in Biometric Access Control technology. Setting new standards in aesthetic and robust design without compromising technical functionality.

- Robust Technology.
- Compact Design.
- Fake Finger Detection.
- LCD Display (limited models).
- Waterproof (limited models).
- WiFi (limited models).
- Digital Camera (limited models).
- Smartphone App (limited models).
- Easy Installation.

RF/SMARTCARD TERMINAL

Card verification method is the most frequently used personal identification method that is easy to use and affordable for access control.

- Graphic LCD.
- Network Connectivity.
- High-performance CPU.
- Complex Authentication.
- Automated Voice System.

SECURITY SERVICES

BUILDING MANAGEMENT SYSTEM (BMS)

Building Management System (BMS) helps you increase operational and energy efficiency and makes managing your facility easier.

At BET Systems we can successfully integrate, install and maintain building management systems and provide life cycle support for facilities like yours, making it easier to increase comfort, safety and security for your occupants.

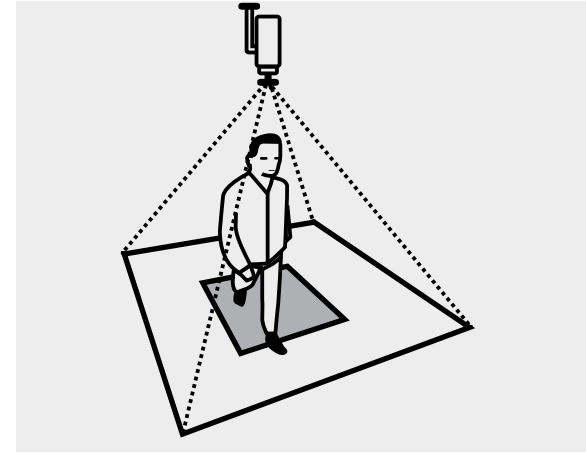

We offer a scalable range of building management and intelligent building solutions and services, from individual subsystems to fully integrated intelligent buildings that reduce risk while delivering world class operating and energy efficiency.

- Open protocol management, all major global industry open standards supported.
- Energy management dashboards and automated control algorithms.
- Utility monitoring for electrical, steam, gas, oil and water.
- Direct support for prior generations of controls to protect your investment.

With our solution, you can adopt a single point of control by integrating new and existing building systems through affordable, customized solutions and realize many benefits, including:

- Enterprise-wide view and automated building control processes.
- Information sharing between departments.
- Increased productivity and operational efficiency.
- Improved response time to events.
- Reduced installation and life cycle costs.

PEOPLE COUNT SYSTEM

People Count System is used for counting the visitor traffic in department stores, shopping malls, stadiums, exhibitions etc. The data is used to analyze marketing programs and can be used to assist with scheduling employees based on visitor traffic.

CENTRALIZED COMMAND CENTER

Our innovative and comprehensive solutions offer complete control over your entire safety and security systems from a single location. All our installations are modern, sophisticated yet simple, and are built to last.

Our Command Centres are maintained by our resident engineers through SLA (Service Level Agreement) during and after warranty period.

INTRUSION ALARM SYSTEM

We offer a range of integrated intrusion solutions that includes everything from small applications to big projects with the highest security standards.

Our range of products integrates to provide secure, scalable solutions for any application and deliver excellent catch performance together with false alarm immunity along with reliable data transmission over a wide range of paths and formats.

IS YOUR TECHNOLOGY UP-TO-DATE AND SECURE?

When we expect our infrastructure to serve the business, performance and security issues start to surface resulting in costly downtime.
Let the experts advise you.

IT SERVICES

AN INTEGRATED TURNKEY SOLUTION IS WHAT WE OFFER YOU.

At BET, our experienced and certified team of professionals delivers the most complex IT solutions to your organization with world-class services. And because we have multi-platform skills, we are able to integrate different technologies as your operation expects, thus making us a «one stop shop» for your advanced technology requirements.

We do not just supply technology products but we consult, implement, configure, integrate, support and maintain various technology solutions, as well as provide hands-on training to ensure your team is fully capable of managing the infrastructure. Just make the right choice and leave the rest for us.

TOTAL CONTINUITY

Your operation is your revenue - ensure business continuity.

TOTAL SECURITY

IT Infrastructure does not only need to be high-available, make sure it is secured.

TOTAL SIMPLICITY

Technology is known to be complex, simplify and centralize its management.

COMPUTING SYSTEMS

Whether your business is classified as Large Corporation or Small & Medium, you need a computing system to run your operations in an efficient way.

The ideal architecture for any such organization has to always be straightforward and easily managed despite its potential complications, therefore we at BET Systems follow the simplest approach to achieve the desired results, hence maximizing the Total Cost of Ownership (TCO) while addressing all the current and future needs of the organisation, be it physical or virtual server solution.

Our expertise ranges from the largest enterprise server solution to the simplest SOHO one-server solution, from the leading brands and manufacturers of servers.

STORAGE & BACKUP SYSTEMS

In today's business environment, large amount of data is generated every minute and since this data is becoming crucial for any organisation, the need of storing it on high available storage devices simply becomes a necessity.

At BET Systems, we strive to design and propose the most effective storage solution taking into consideration the cost per GB as well as its resiliency and high availability for business continuity. Whether it is a simple Direct Attach Storage solution or a complex Storage Array Network, our engineers are capable of integrating any storage solution and ensure the data residing on it is protected against human errors and natural disaster by implementing an Enterprise Backup Solution from top tier software and hardware providers.

NETWORKING SOLUTIONS

At the heart of your IT environment lies the Network. It is a crucial part of your organisation's infrastructure and requires expertise to implement it since it is the access to your business and should not only be efficient and available, but also secured and protected against external and internal threats.

At BET Systems, we provide networking solutions covering the widely requested Routing & Switching, to Network Security, Wireless, Collaboration (IP Telephony, Video Conferencing, Instant Messaging) and IP Television, all integrated and centrally managed for ease of operation. We also offer passive components installations, such as structured cabling. The brands we implement are from leading worldwide manufacturers.

IT SERVICES

END-USER DEVICES & PERIPHERALS

No matter how much your backend IT environment is advanced, business productivity requires your users to be equipped with devices which connect to your network and use your published business applications.

From handled devices to sophisticated workstations, from personal printers and scanners to workgroup ones, BET Systems not only supplies such end-user devices and peripherals, but also implement advanced solutions around them, such as Desktop Virtualisation and Per-Use Printing solutions.

IT SUPPORT SERVICES

Irrespective of the size of your business, it depends largely on IT and thus it is mandatory to ensure the infrastructure delivers the required value by running optimally.

BET Systems' support services go beyond traditional break-and-fix support to proactive and critical support services to ensure possible deficiencies are detected early enough and corrected before costly downtime happens. Organizations should no longer look at Support Services as an operational cost but as an investment towards steadily growing your business.

IT PROFESSIONAL SERVICES

An IT Solution from leading manufacturers is what most organisations look to implement, however no matter how complex or simple is this solution, its performance depends largely from the way it is implemented and configured.

BET Systems' engineers are certified and qualified to implement the most complex of the solutions in accordance with best practices and as per customers' requirements. We also ensure that proper knowledge transfer is provided before, during and after implementation so that the site system administrators are capable to manage the infrastructure and attend to basic operational issues which reduce the time to resolution and enhance the availability and productivity.

IT CONSULTANCY SERVICES

Many IT Services companies have the expertise the supply, implement and support solutions, however few have a consultative approach like BET Systems has. Solutions meeting most of your organizations requirements can vary but there are very limited solutions which meet all your requirements and our job at BET Systems is to ensure that we put our consulting services to your disposition to ensure that our proposed solution is the most adequate one in terms of functionality, performance, availability and TCO.

OUR PARTNERS

We are constantly evolving with our partners and vendors and remain closely committed to them to continuously provide them with faster access to new and emerging markets.

GRANDSTREAM
CONNECTING THE WORLD

OUR ICT PROJECTS

Some of the executed ICT Projects

- Eko Hotel & Suites, Victoria Island: Complete IP Solution, including Cisco IP Telephony, IP TV, Routing, Switching, Network Security, Network Management
- Laim Hotel, Osogbo: Complete IP Solution, including IP Telephony, IP TV, Routing, Switching, Network Security, Network Management, Oracle Property Management System, Sage Enterprise Resource Planning
- Nigerian Customs Service, Abuja: HPE Blade Servers, HPE Rackmount Servers, HPE Fiber Channel Storage, Cisco Routing & Switches, APC UPS
- Boulos Enterprises, Ikeja, Abuja: HPE Blade Servers, HPE Fiber Channel Storage, HPE Networking

OUR SECURITY PROJECTS

Some of the current Projects

- Azuri Towers: Bosch Fire Alarm & Detection System, Bosch IP Surveillance Solution, Bosch IP Access Control Solution, Honeywell CO Sensor Solution, Honeywell Tenant Billing Solution, Gunnebo Speedstiles
- Eko Atlantic Sub-Stations: Bosch Fire Alarm & Detection System, Dahua IP Surveillance Solution, Ubiquiti Networking Solution
- Lycee Louis Pasteur: Bodet School Bell Solution, Cooper Fire Alarm & Detection Solution, Dahua IP Surveillance Solution, Dahua IP Access Control Solution, Dahua IP Video Door Phone Solution
- Number One: Zeta Fire Alarm & Detection System, Dahua IP Surveillance Solution, Dahua IP Access Control Solution, Televes SMATV, FAAC Gate Barrier Solution, Fermax IP Video Door Phone Solution

Some of the delivered Projects

- Mouka Foam: Bosch Video-Based Fire Detection & Alarm System
- Kuramo Beach Resort: Arecont Vision IP Video Surveillance Solution, Turnstar Gate Barrier & Full-Height Turnstile, Astrophysics Walkthrough Scanner
- African Datacenters: :Lenel Access Control Solution, Ziton Fire Detection & Alarm System, Bosch CCTV

- Laim Hotel, Osogbo: Dahua IP Surveillance Solution, ZKTeco IP Access Control Solution, Zeta Fire Alarm & Detection Solution, Bosch Voice Evacuation Solution, Yamaha Audio/Video Solution, Ubiquiti Networking & Wireless Solution, Televes IPTV Solution
- 16 Temple Towers, Ikoyi: IP Arecont Vision/Dahua Surveillance Solution, Dahua Access Control Solution, Bosch Fire Alarm & Detection Solution, Bosch Voice Evacuation Solution, Panasonic PABX
- PABOD Breweries, Port-Harcourt: Bosch Fire Alarm & Detection Solution
- New Market, Port-Harcourt: Zeta Fire Alarm & Detection Solution
- Real Madrid Academy, Port-Harcourt: Zeta Fire Alarm & Detection Solution, Dahua IP Surveillance Solution, Ahuja Voice Evacuation Solution, Ahuja Audio/Video Solution
- NNPC Towers, Abuja: Honeywell Building Management System (BMS)
- British American Tobacco, Ibadan: Honeywell Building Management System (BMS)
- Microsoft Office (Kings Tower): Honeywell Building Management System (BMS)
- Ecobank Pan-Africa Center, Victoria Island: Dahua IP Surveillance Solution, Bosch IP Access Control Solution, Bosch Fire Alarm & Detection Solution, Bosch Voice Evacuation, Parksol Parking Guidance System, Cisco IP Telephony, Cisco WiFi, Televes SMATV , Gunnebo Speedstiles
